Art Unit: 1782

## DETAILED ACTION

## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claim(s) 1-12, are drawn to a method for controlling the condensate or frost formation in chocolate shell production.
- Group II, claim(s) 13-23, are drawn to a device for controlling the condensate or frost formation in chocolate shell production.

The special technical feature of Group I appears to be the step of blowing of the dehumidified air in direction of protrusions. The corresponding technical feature in Group II appears to be the supply means corresponding to the blowing of the dehumidified air. However, the inventions listed as Groups I and II lack unity of invention because even though the inventions of these groups require the technical feature of a supply means for the blowing of the dehumidified air in direction of protrusions, this technical feature is not a special technical feature as it does not make a contribution over the prior art in view of Klaes [US 7,582,319]. Klaes discloses a device for producing shell-shaped consumable goods (abstract) where the device comprises protrusions (cooling body) (see claim 18) and a supply means (compressed air source) whose outlet flows directly into the environment (alveolus) and is orientated in direction

Application/Control Number: 10/531,923

Art Unit: 1782

of protrusions (air source configured for insuffilating into the alveolus an air current rotationally symmetrical with respect to the common axis of symmetry of the alveolus and the cooling body) (see claim 21 and col.3, lines 38-48). Because the common feature does not satisfy the requirement for being a special technical feature it follows that it cannot provide the necessary technical relationship between the identified inventions. Therefore the claims do not satisfy the requirement of unity of invention a posteriori.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof.

Applicant may submit evidence or identify such evidence now of record showing the

Application/Control Number: 10/531,923

Art Unit: 1782

inventions to be obvious variants or clearly admit on the record that this is the case.

Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LUANA Z. LONG whose telephone number is 571-270-1152. The examiner can normally be reached on 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
